

FACT BOOK
ON
THEOLOGICAL
EDUCATION
1979-80

Marvin J. Taylor, Editor

Association of Theological Schools
in the United States and Canada
P.O. Box 130
Vandalia, Ohio 45377

ACKNOWLEDGMENTS

The Fact Book is published by the Association of Theological Schools to assist member schools in planning and administration and to provide information about the theological education enterprise to donors and others who have an interest in theological education.

Information received from our member schools is held in confidence except that by dint of unusual sleuthing one may discover a particular salary by cross-referencing a combination of tables. We do not intentionally reveal salary data of any individual school. Further deletion of the data would, however, seriously undermine the usefulness of the book in meeting planning needs.

This year the shift to the use of our own computer has paid off, with all tables upon which the Fact Book are based having been completed by the computer by January 10. This makes possible the publication of the Fact Book at a much earlier time than ever before. We hope that the information in its timeliness will be much more useful to our readers.

For all who use the Fact Book I want to express gratitude--

- to the administrative staff in the member schools who provide the data in the annual report forms;
- to Charlotte Thompson for seeing the mass of data through the computer;
- to Nicholas Donatiello, Jr. for basic work on designing the computer programs and to Douglas Neely for debugging and coaxing the system to yield the data in the form of reports;
- to the Arthur Vining Davis Foundation for the generous grant which made the computer and software available to the Association;
- to Marilyn Horner for careful preparation of photo-ready typescript and to Marcy Bookwalter for assembly and makeup; and
- to Marvin J. Taylor for his thoughtful analysis of the data as associate director and for his careful work as editor of the book.

Jesse H. Ziegler, Executive Director
Association of Theological Schools
January 14, 1980

INDEX OF TABLES

<u>Table</u>	<u>Title</u>	<u>Page</u>
1	Total Enrollment Trends, 1969-79	1

INTRODUCTION

This is the eleventh Fact Book published by the Association of Theological Schools in the United States and Canada. The data are supplied by member institutions in the two countries, this year numbering 193. The enrollment data, employment statistics, and salary information are current--1979-1980 academic year. The financial data and library information are the latest complete year audited reports, 1978-79. The per student revenue information utilized Fall 1978 enrollments (found in Table A) and the 1978-79 financial reports.

Through the decade additional information has been sought but the basic format for the successive Fact Books has remained unchanged. Last year additional sex/race/minority data were published in detailed form. This practice has been continued this year. For the first time this year Native American enrollment is reported in the text. It was not computerized, since the numbers are so small. Denominational enrollment of black students is included in the text for the second year.

Table A lists all member schools and identifies the basis for the classifications in the appendices. Table B reports enrollment at four-year intervals since 1956.

Certain arbitrary definitions have been necessary with respect to these classifications. For example, a seminary is classified as a part of a university only if the larger institution possesses at least two other professional schools or departments. Schools are classified as related to a cluster only if the relationship includes at least two other seminaries. Denominational groups of schools are sorted and reported publicly -- in the Fact Book -- only if the denomination maintains at least four institutions which are members of the Association. Because the computer cannot accommodate dual denominational relationships of some schools, each has been classified on the basis of the primary

student body relationship. Thus, Louisville Presbyterian is included in the United Presbyterian category, Andover Newton in the United Church of Christ, and Trinity Lutheran in the American Lutheran group. Neither Bexley Hall nor Berkeley Divinity School, Episcopal seminaries, are included in the Protestant Episcopal data because of their relationships with Colgate Rochester and the Yale Divinity School respectively.

The text has been prepared to report and emphasize the most important data. Factual description is the purpose. No value judgments about size of school, mode of financing, patterns of expenditure, or other matters are intended. Each reader is invited to make his/her own judgments on these matters in the light of the data presented in reference to his/her own perspectives on theological education.

As in the past, all salary scales have been edited to preserve confidentiality. Hence any category with less than three persons has been eliminated.

The Editor

ENROLLMENT

Enrollments in higher education in recent years have tended to defy general predictions. For some time students of the demographic data have expected sharply declining enrollments. To date it has not occurred. It is true that college and university populations have been relatively stable, rising only slightly from the previous year, usually one or two percent. Seminary enrollments have grown at a somewhat larger rate, except for 1972. The range of increase has been from +2.7% (1978) to a high of +11.0% (1975). 1979 has once again run counter to these expectations. The rate of increase was +4.2%, almost precisely parallel to the unexpected growth this year in colleges and universities generally.

TABLE 1
TOTAL ENROLLMENT TRENDS, 1969-1979

Year	Number Schools Reporting	Professional Programs	Graduate Programs	Total
1969	170	25,950	3,865	29,815
1970	179	26,322	4,750	31,072
1971	187	28,208	4,608	32,816
1972	189	29,034	4,002	33,036
1973	190	30,315	3,767	34,082
1974	191	33,189	3,641	36,830
1975	192	37,179	3,716	40,895
1976	193	39,291	3,732	43,023
1977	191	41,665	3,557	45,222
1978	193	42,809	3,651	46,460
1979	193	44,374	4,059	48,433

It should be noted that the successive years recorded in Table 1 are not precisely parallel. There is a different number of institutions reporting each year, making the comparisons questionable. For example, the 48,433 persons registered in 1979 represent an increase of +62.4% over the 29,815 in 1969. However, twenty-three additional institutions are included in the data for last autumn. Table 2 provides precisely comparable information for 160 seminaries which reported in both 1969 and 1979. The increase in that decade has been +51.3%, representing

TABLE 2
COMPARABLE ENROLLMENTS 1969-1979:
THE SAME 160 INSTITUTIONS REPORTING

Year	Number of Students	% Change
1969	28,843	
1979	43,653	+51.3%

very substantial growth within the same group of institutions.

There are also some interesting institutional statistics between 1969 and 1979. Total membership rose from 170 seminaries to 193. But this was not accomplished simply by receiving twenty-three new members. Actually forty-five new member schools joined ATS in the decade, but fourteen institutions closed their doors, simply ceasing operations. And another fifteen were involved in mergers, from which eight current member theological schools emerged. Thus, the change in just ten years has been considerably more pronounced than the simple numbers might indicate.

TABLE 3
COMPARABLE ENROLLMENTS 1974-1979:
THE SAME 183 INSTITUTIONS REPORTING

Year	Number of Students	% Change
1974	35,799	
1979	47,045	+31.4%

Table 3 provides the same kind of precise comparison for the last five years, 1974 and 1979. It should be noted that the Association's substantial growth in number of member institutions came in the earlier five-year period, up from 170 in 1969 to 191 in 1974. Hence the 1979 data comprise only two more institutions than 1974, but twenty-three more than 1969. Total enrollment growth in this latest five years was +31.5%, almost identical with the same 183 seminaries noted in Table 3 which increased +31.4%.

Please refer to Tables C-1, D-1, and E-1 for distributions of these students across the several degree programs offered by theological schools. C-1 provides the data in groups divided by size and status categories; D-1 for several denominational families; and E-1 by regions. Table C-6 reports the enrollment on a "full-time equivalency" basis rather than a "total person" count. The FTE number in 1979 was 36,795, or 76.0% of the person count. This was down from 78.0% just last year, reflecting the trend toward increasing numbers of part-time students. This is a new phenomenon for theological schools, one which will require increasing adjustments if it continues and increases. The M.Div. degree, the basic degree which enrolls far more students than any other, in 1979 found its students on the average registered for 89.9% of full-time loads, up slightly from the 88.3% reported the previous year. Thus the part-time students are obviously enrolled more often in other degree programs, especially the D.Min.

Professional Degree Registrations

Table 4 provides data for enrollment in the several professional degree programs in successive years since 1969. The greatest growth is in the D.Min., a new program begun at the beginning of the decade. In 1969 there were 201 enrollees; by 1979 it had risen to 5,327. Eighty-four member institutions now offer the degree, in contrast with only four in 1969. This includes both in-sequence and in-ministry programs, with a distribution of them found later in Table 5. The two-year masters degrees also continue their more modest growth, this year constituting 16.2% of professional enrollment, up from only 10.2% ten years ago. Much of this rise is in persons who have no professional employment objectives but who nonetheless seek a degree in theology. Each year an additional three to six hundred persons are registered here.

Finally it is surprising to note that despite a total increase of 1,973 persons enrolled in seminaries, M.Div. students actually declined by 259 registrants. This is the first time since 1973 that a net loss in M.Div. enrollees

has occurred. When the continued substantial increase in women's enrollment is examined, it becomes apparent that for the first time ever there was a drop in

% of Total	12.0%	59.4%	16.2%	12.1%

male M.Div. students, a net decrease of 579 men in the basic ordination degree program. This was certainly unexpected and is a significant factor for theological schools to consider.

Table 5 reports more detailed information on the D.Min. degree. Begun initially as an in-sequence degree, a four-year alternative to the traditional three-year B.D., the D.Min. rather quickly was transformed into a post-ordination degree for clergy with some full-time ministry experience. When first authorized by the Association, the D.Min. developed in both tracks rather rapidly. But it was soon apparent that not many students were interested in an additional year of theological education prior to beginning their ministries. Consequently the in-sequence degree has been steadily diminishing in both enrollment and the number of

TABLE 5
DISTRIBUTION OF D.MIN. ENROLLMENTS

Year	D.Min. In-Sequence		D.Min. In-Ministry		Total D.Min.	
	Schools Reporting	Total Persons	Schools Reporting	Total Persons	Schools*	Persons
1975	25	499	59	3,211	61	3,710
1976	20	478	63	3,774	66	4,252
1977	21	448	73	4,043	75	4,491
1978	16	434	79	4,399	81	4,833
1979	16	415	82	4,912	84	5,327

* Note: Some institutions offer both types of program

institutions making it available. Fewer than half the in-sequence programs begun in the early 1970's still exist. By way of contrast the in-ministry D.Min. continues to flourish. The number of institutions offering the degree has risen +37.3% since 1975, and the number of enrollees has increased +53.0%. Thus it is apparent that the in-sequence D.Min. is no significant threat to the M.Div. That continues to be the basic ordination degree, expected by most denominations, and preferred by the vast majority of students. D.Min. registration by denomination is available in Tables D-1 through D-5, with regional enrollments in E 1-6.

Graduate Student Enrollments

Graduate degrees are identified by the Association as those which usually require the M.Div. for admission and customarily entail from one to three or four

years of additional study and research. Only the in-ministry D.Min. is excluded, since it is viewed as an advanced professional degree. The data for these several graduate degrees are recorded in Table 6. When comparisons are made with 1969,

TABLE 6
CHANGES IN GRADUATE ENROLLMENTS AND
PERCENTAGE OF CHANGE

	Th.D. S.T.D.	Ph.D.	Masters	Total
1969 Number	590	876	2,399	3,865
1970 Number	540	1,220	2,990	4,750
% Change	-8.5%	+39.3%	+24.6%	+22.9%
1971 Number	779	1,283	2,546	4,608
% Change	+44.3%	+5.2%	-14.8%	-3.0%
1972 Number	733	1,134	2,135	4,002

% Change	-16.6%	+15.8%	-7.6%	+0.4%
1977 Number	437	1,628	1,492	3,557
% Change	-8.8%	-6.1%	-1.8%	-4.7%
1978 Number	437	1,590	1,624	3,651
% Change	0	-2.3%	+8.8%	+2.6%
1979 Number	461	1,715	1,883	4,059
% Change	+5.5%	+7.9%	+15.9%	+11.2%

only the Th.D. has diminished--down -25.9% during the decade. But this datum is very misleading. Several graduate schools changed nomenclature during the decade, shifting to Ph.D. with little change in program content. Hence the +92.7% rise in Ph.D. students is also confusing. The best way to assess this

information is collectively. In 1969 there were 1,466 doctoral students (Th.D. and Ph.D.). By 1979 this had risen to 2,176 persons, up +48.4%. Since total enrollment of all theological students rose +62.4%, doctoral enrollments increased at a considerably slower rate. When the well-known shortage in teaching positions is considered, it is somewhat surprising that 1979 would reveal an increase of +7.4% in doctoral students for the second highest total in the decade.

Enrollment in graduate masters degrees continued its unpredictable rise. From a high of 2,990 registrants in M.A./Th.M./S.T.M. programs in 1970, there was a steady decline to a low of 1,492 in 1977. However the next year revealed a considerable rise to 1,624 (up +8.8%), and up again to 1,883 (+15.9%) this autumn. The explanation is difficult to find. It is probably accurate to associate the decline with the parallel rise in D.Min. in-ministry students. Experienced clergy seeking additional education moved away from the masters to the D.Min. But this hardly accounts for the growth the past two years. In any event it does seem evident that clergy in significant numbers are still interested in post-M.Div. masters degree education.

Sex Distribution of Theological Students

Data on the sex distribution of students has been collected since 1972 and reported in each annual Fact Book. Full computer analysis is found in the appendices in Tables C-3, D-3, and E-3. The parallel data for women graduates is available in F-3, G-3, and H-3.

Table 7 provides summary data for the seven year period. While still representing only a very modest proportion of total student enrollment, women nonetheless have been increasing in numbers at a very rapid rate. In 1972 they comprised only 10.2% of the total, or 3,358 persons. This has more than tripled to 10,204 in 1979, up +203.9%. In that same seven-year period the number of men rose only +28.8%. But despite this large percentage increase, note the caution indicated above. The 10,204 number is only 21.1% of total enrollment, far below their proportion in society.

TABLE 7

1979	10,204	21.1%	38,229	78.9%	48,433

Table 7 also indicates the distribution of women in the several program categories. Curiously enough women are in identical proportion (21.1%) of professional, graduate, and total student groups, an unusual coincidence. They continue to have their largest representation in the two-year programs, which includes the religious education degrees, a field in which women have always been numerous. Thirty-two percent of this enrollment is clustered in the six Southern Baptist institutions which serve the largest Protestant denomination and employ many women as directors of religious education in local churches. There is also a high proportion of women among special students. The smallest proportion continues to be the three- and four-year preordination degrees, M.Div. and in-sequence D.Min. where they comprise 15.3% and 25.8% respectively. It is interesting to note that a greater proportion of women has been attracted to in-sequence D.Min. education than the more traditional M.Div.

The increase in women enrolled in graduate programs is also apparent. The growth of graduate masters students has already been cited above in Table 6. Women participated fully in this reaching 423 persons, or 22.5% of the total. And the rather slight decline in women graduate students reported last year was fully reversed. One of every five doctoral enrollees this year was female, a substantial improvement over the 1:13 ratio of 1972. Not only did doctoral registrations increase this year, but the role of women increased slightly more, growing from 18.8% to 19.9% in the single year.

TABLE 8
TOTAL WOMEN GRADUATES FROM POST-M.DIV.
ACADEMIC PROGRAMS

Year	Masters Degrees		Doctoral Degrees	
	Number	% All Graduates	Number	% All Graduates
1972-73	58	7.7%	17	5.4%
1973-74	56	8.5%	18	5.4%
1974-75	59	8.8%	21	6.6%
1975-76	101	16.8%	32	10.4%
1976-77	77	13.8%	22	8.9%
1977-78	108	20.9%	36	12.0%
1978-79	119	19.9%	30	10.3%

Table 8 provides summary data for women graduating in 1978-79 from post-M.Div. programs. S.T.M./Th.M./M.A. graduates, numbering 119 persons, reached the highest point since data have been collected. However doctoral recipients continue to vary greatly in number and proportion. This year it was thirty persons, down from thirty-six last year or thirty-two three years ago. Thus it appears that academic doctoral success is still a questionable and inconsistent achievement for both men and women. The pool of women scholars available for teaching positions continues to increase, but somewhat slowly.

Table 9 reports on women graduates from three of the professional degree programs, the M.R.E., M.Div., and D.Min. in-sequence. These are entry level

TABLE 9
WOMEN PROFESSIONAL DEGREE GRADUATES

	M.R.E.		M.Div.		D.Min. In-Sequence	
	Number	% Total	Number	% Total	Number	% Total
1976-77	312	32.8%	462	8.4%	12	9.1%
1977-78	328	37.5%	567	10.1%	12	12.0%
1978-79	305	38.2%	858	13.2%	13	16.9%

credentials for the various careers in ministry. In each instance there is a slow but steady increase in the proportion that women represent of all graduates receiving the degrees in each year. The growth in numbers of M.Div. graduates is especially significant. Taken collectively with the in-sequence D.Min. Table 9 indicates that there were 83.8% more women available for pastoral appointments in 1979 than was the situation just two years earlier. Comparisons about other degrees may be made by examining Tables F-1 and F-3 in the appendices.

Table 10 summarizes data from Tables G-1 and G-3 for the preceding three years. It presents the information for each of the Protestant denominations whose statistics are published in these Fact Books annually. Almost all denominations have a steadily increasing number of women with ordination credentials.

1978-79	160	15.9%	1	12.5%	161	15.9%

Several denominations graduated more than twenty percent women in 1978-79: United Methodist (23.2%), United Presbyterian (28.5%), United Church of Christ (29.3%). Even the Southern Baptist seminaries, many of whose local churches have been

reluctant to ordain women, graduated sixty-five women with the M.Div. degree last year.

Black Student Enrollment

The Association has collected data on the enrollment of black students for ten years, and that information is available in Table 11. Across that period black students have grown in number from 808 persons to 2,043 (up +152.8%).

TABLE 11
CHANGES IN BLACK STUDENT ENROLLMENT

Year	Number of Black Students	% Change	% of Total Enrollment
1970	808		2.6%
1971	908	+12.4%	2.8%
1972	1,061	+16.9%	3.2%
1973	1,210	+14.0%	3.6%
1974	1,246	+ 3.0%	3.4%
1975	1,365	+ 9.6%	3.3%
1976	1,524	+11.6%	3.5%
1977	1,759	+15.4%	3.9%
1978	1,919	+ 9.1%	4.1%
1979	2,043	+ 6.5%	4.2%

While the percentage is high, it must not be misunderstood. The proportion that blacks represent in the total student population rose during that time from 2.6% to only 4.2%. Starting with such small numbers, even a sizeable increase still leaves blacks greatly underrepresented in theological schools. See Tables C-2, D-2, and E-2 for full details, and these may be compared with earlier editions of the Fact Book.

The 4.2% ratio is also misleading, for blacks are very unevenly distributed across the Association's schools. Five are primarily black in character, and they together enroll 584 blacks, with the remaining 1,459 distributed across the other 188 seminaries. Thus more than one-fourth of the blacks (28.6%) are in these five institutions. Among the primarily white schools the twenty inter- or nondenominational seminaries enroll 310 black students, United Methodist (264),

American Baptist (188), Southern Baptist (142), United Presbyterian (128), and lesser numbers in other denominational groups. The reader should not be confused by the fact that Table D-2 reports 734 blacks in the inter- or nondenominational category. That includes two primarily black institutions which together report 424 students. The 310 blacks noted above are in the remaining twenty primarily white institutions in this grouping.

Table 12 reports black enrollment by sex distribution within the several broad degree categories for alternate years since 1972. The increase in women's enrollment noted earlier is also evident here, although the percentages continue to lag somewhat behind those for all women. For example: the total group of women constitute 21.1% of enrollment, but black women are 18.2%. However in the three- and four-year programs related to ordination black women exactly match the overall average with 13.6%. And as a group black women are more likely to be registered for a degree.

More significant differences appear in the graduate degree programs. Blacks, who as a group are 4.2% of total enrollment, make up only 2.1% of graduate students. And their numbers have actually been declining in recent years. The largest registration of blacks in graduate programs came in 1973 when there were 120 persons. In 1979 this was only 87, the same number as the preceding year. And all of this decline has been men. In 1973 there were only eight women, and 112 men. By 1979 women's enrollment had risen to twenty-one, with male registration falling to a low of sixty-six. This was the largest number of black women to ever be enrolled, and the smallest number of black men. About one-in-four black doctoral students is now a woman, in contrast to the one-in-five ratio for all women enrollees. These observations are based upon the data reported in Table 12 and comparisons with predecessor parallel tables in prior editions of the Fact Book.

Table 13 provides data across successive years about blacks receiving graduate degrees. Once again the situation with respect to post-M.Div. masters

TABLE 13
TOTAL BLACK GRADUATES FROM POST-M.DIV.
ACADEMIC PROGRAMS

Year	Masters Degrees		Doctoral Degrees	
	Number	% All Graduates	Number	% All Graduates
1972-73	9	1.3%	6	1.9%
1973-74	16	2.4%	8	2.4%
1974-75	17	2.2%	10	3.2%

1977-78	17	3.3%	9	3.0%
1978-79	8	1.3%	10	3.4%

exhibits no pattern. 1978-79 graduates were the second lowest number on record, only eight recipients. But doctoral graduates matched the highest number ever, ten persons. Whether these levels can be sustained, in the light of diminishing enrollments, is questionable.

Hispanic/American Enrollment

Reference should be made to Tables C-4, D-4, and E-4 in the appendices for full details on Hispanic/American enrollment. This information has been collected since 1972 and published in each successive Fact Book. Table 14 gives summary data for alternate years, as well as 1979. In the interim since 1972 enrollment has risen from 264 persons to 822 this year, slightly more than tripling. While the growth is a positive indication, Hispanics still represent only 1.7% of seminary enrollment, in contrast to their approximately ten percent representation in the population of the United States. The proportion of Hispanic women lags well behind women as a total group (15.3% as compared with 21.1%). And graduate enrollment of Hispanics is even less favorable. It stands at only 1.0% of the total graduate population, indicating that Hispanics are more likely to be found in the professional programs than other ethnic/racial

born abroad or in the U.S.A. and its trust territories in the Pacific Ocean." The Association has collected this information for only three years, all of which are included in the table. There has been an increase this year of seventy-eight persons, up +15.6%. The 577 enrollees represent 1.2% of the total enrollment in member institutions. The ratio of women students also lags slightly behind the overall proportion, as is true of black and Hispanic women. Their distribution among the degree categories is normal. However, in contrast with blacks and Hispanics in post-M.Div. programs (who are generally underrepresented there) Pacific/Asian Americans are slightly overrepresented. Graduate enrollment in total is 8.4% of all students; black graduate students are 4.3% of their group; Hispanics are 5.0%; but Pacific/Asian graduate students are 13.0%. Thus as a group they are two and one-half times more likely to be registered for a graduate degree than other ethnic/racial categories. In 1978-79 Pacific/Asian Americans received three graduate academic doctorates and twelve graduate masters degrees, as compared with seven doctorates and seven masters the previous year. Data on current enrollment can be found in the appendices, Tables C-5, D-5, and E-5; on graduates in F-5, G-5, and H-5.

Changes in Professional Enrollments in Denominational Schools

Table D-1 provides the information for all of the several degree programs within the denominational groupings of schools of theology. This table is parallel to those in previous editions, making direct comparisons possible. Total enrollments in these individual programs across the years are also reported in Table 4 above. As indicated there growth of enrollment in the M.Div. through the years has been limited, and it actually decreased slightly in 1979. In contrast enrollment in other degrees (M.A., M.A.R., M.T.S., and D.Min.) has continued to rise much more rapidly.

Despite the above facts, there are frequently expressed comments indicating a fear that too many ordinands are being graduated and churches are and will continue to be unable to place them. The data are varied among the denominations,

TABLE 16
ENROLLMENT TRENDS IN DENOMINATIONAL GROUPS:

1979	4,193	+23.8%	638	+69.2%

as is reflected in Table 16. But it also demonstrates that much of the increase is not in the ordination programs (M.Div. and in-sequence D.Min.) but rather in the in-ministry D.Min. which serves the continuing education interests of clergy without adding persons to the clergy rosters. The overall growth in preordinands

(M.Div. plus in-sequence D.Min.) was +11.5% in the years between 1975 and 1979. In sharp contrast in-ministry D.Min. enrollment rose +53.0%. Although not included in Table 16, the two-year degree enrollment paralleled this increase +36.3%. Some denominations (Lutheran Church in America, United Methodist, Protestant Episcopal) had a net decrease in persons studying for ordination. Only the Southern Baptist schools exhibited a sharp increase in M.Div. enrollees, a fact which probably reflects the continued growth of that Convention's churches. This contrasts starkly with the static or even declining statistics for other denominations. The interdenominational grouping, which includes some of the larger evangelical schools, also had M.Div. growth far above average. In contrast most of these groups exhibited much larger D.Min. in-ministry increases. All of these facts quite clearly counter the myth that large numbers of additional persons are being prepared for ordination. The increase is modest, only insignificantly related to the new D.Min. degree.

Table 16 also reveals the very uneven distribution of D.Min. students. For example, six United Presbyterian schools collectively register 1,337 in-ministry candidates (an average of 222+ each). In contrast the twelve United Methodist institutions average only fifty-five D.Min. students. Only one denomination is higher, Southern Baptist at eighty-three persons. Similar observations can be made about the two-year degrees. They are especially attractive to Southern Baptists apparently, since 2,351 persons, or 32.8% of the total, are in these six institutions. The religious education masters is even more pronounced. The six schools collectively have 62.3% of these students.

Changes in Numbers of Graduates

Table 17 reports the data for the past eleven years of graduates from member schools of theology. The complete information can be found in Tables F-1, G-1, and H-1. There are parallel tables for blacks, women, Hispanics, and Pacific/Asian Americans. Last year the substantial increase in M.Div. graduates was noted, after nine years of little change. That higher figure was not only

TABLE 17
CHANGES IN NUMBERS OF GRADUATES:

1977-78	6,362	+13.2%	908	+ 0.7%	1,897	+ 7.1%	193
1978-79	6,577	+ 3.4%	924	+ 1.8%	1,961	+ 3.4%	193

sustained but actually increased by +3.4% in 1978-79. Thus the higher M.Div. enrollments noted in 1975 and succeeding years are now producing more persons available for ordination. The number of D.Min. graduates inches up slowly, reflecting the fact that the sharp increases in enrollment tended to slow somewhat in 1976 and later. This year's renewed increase will be reflected in graduation data in two or three years. Finally the rate of graduates from two-year degrees also increases modestly each year. Their ratio in comparison to enrollment does raise some question about continuity among these students. Of all the professional degrees, these would appear to have the lowest rate for completion.

Table 18 provides parallel data for the doctoral degrees related to teaching. Religious education doctorates reached their highest level ever in 1978-79, twenty-one persons. Th.D./S.T.D. graduates surprisingly rose by +13.0% last year, running counter to the steady decline in enrollment since 1971. There is no ready explanation for this, except perhaps the unpredictability of dissertation writing. Ph.D. graduates, in contrast, declined this year. An examination of the table reveals the absence of any trend in such achievements. The uncertain length of doctoral education, regardless of degree, is probably a factor.

TABLE 18

denominations, not just those which officially sponsor member schools. Table 19 records this distribution of church membership both for 1978 and 1979. A comparison of the two years obviously suggests reservation about accuracy. Notice for example that ten percent were reported as Baptist only, otherwise unspecified. Almost one-fifth this year are of unknown membership. All of which suggests that seminaries may not be receiving reliable answers to their queries, especially where numerous church bodies carry generic family names such as Baptist, Presbyterian, or Methodist. Nonetheless the information is far more accurate than our previous unsubstantiated estimates. The Association will continue to collect these statistics and will hope to refine them in the process.

Native American Students

Fall 1979 was the first year that the Association has requested information on Native American students. The request was obviously misunderstood,

TABLE 20

since several thousand were initially reported. Every effort was made to check the information for accuracy, and the data in Table 20 are the result of that effort. "Native" was defined in the instructions as either Indian or Eskimo, native to the United States or Canada. The information was rather surprising,

since informed estimates of enrollment seldom rose above twenty to thirty persons. However fifty-two were reported and confirmed. By far the largest number is registered for the M.Div., twenty-nine persons. Of special interest will be the fact that three doctoral students are registered this year. The Association will continue to collect this information in succeeding annual reports.

NUMBER AND DISTRIBUTION OF PERSONNEL

Tables O through V provide the detailed information on the distribution of personnel in the categories of administration, faculty, and library staff. The format of these Fact Books has been the same from year to year. Hence

TABLE 21

direct comparisons may readily be made. The tables report the data in size, status, and denominational categories.

Table 21 summarizes these total employment statistics for each of the successive years and makes some statistical comparisons across that span. It is readily evident that a general trend upward in administrators and faculty has occurred. This is also true of library staff, but far less pronounced. But none of these has matched student growth. To state this more clearly, the average student body has risen from about 174 students in 1970 to 251 persons, while average faculty size per school has remained virtually constant at twelve plus persons. The average seminary in 1970 had 4.19 administrators; 12.0 faculty; and 2.17 library staff. It still has five plus administrators, twelve plus faculty, and two plus librarians. The growth in numbers of employees can almost all be explained by additional member schools. Thus, the employment of additional personnel has not matched student growth.

TABLE 22
COMPARISONS OF FULL-TIME AND PART-TIME INSTRUCTIONAL
PERSONNEL AS PERCENTAGE OF TOTAL TEACHING STAFF

Year	Number Full-time	Number Part-time	Full-time Equiv.	Total, incl. Full-time Equiv.	% of Full-time Equiv. Supplied by Part-time Persons
1971-72	2,297	1,498	429	2,726	15.7%
1972-73	2,308	1,661	470	2,778	16.9%
1973-74	2,255	1,991	522	2,777	18.8%
1974-75	2,237	1,777	525	2,762	19.0%
1975-76	2,349	2,023	581	2,930	19.8%
1976-77	2,386	2,135	597	2,983	20.0%
1977-78	2,383	2,168	611	2,994	20.4%
1978-79	2,397	2,053	589	2,986	19.7%
1979-80	2,440	2,099	594	3,034	19.6%

Table 22 continues this reporting of faculty personnel by considering the part-time instructional staff. Their number has also increased. But it appears that this may have peaked in the 1977-78 academic year when 2,168 were employed.

Last year it slipped to 2,053 persons, with the full-time equivalency also dropping to 589. This year it rose modestly again, but well below the peak of two years ago. In a parallel manner the ratio of instruction supplied by part-time persons also fell from 20.4% to 19.7% and 19.6% respectively in the last two years.

Sex and Race Distribution of Personnel

Tables 23 and 24 provide the changing picture of employment of women in the member schools of theology. These data have been collected for the past nine years, and some upward change is evident. Women in administrative posts have grown from 103 to 182, an improvement even though they still represent

TABLE 23
SEX DISTRIBUTION OF ADMINISTRATIVE PERSONNEL

Year	Men	% Total	Women	% Total	Total Persons
1971	743	87.8%	103	12.2%	846
1972	759	87.8%	105	12.2%	864
1973	780	87.8%	108	12.2%	888
1974	812	88.5%	106	11.5%	918
1975	823	86.6%	127	13.4%	950
1976	809	85.2%	141	14.8%	950
1977	792	84.1%	150	15.9%	942
1978	827	82.6%	174	17.4%	1,001
1979	813	81.7%	182	18.3%	995

only 18.3% of total employees. It should be noted that the 813 men this year are only one more than 1974, yet women staff have risen from 106 to 182 in that period. This is an unusual change.

Table 24 registers the same information for faculty members, both full and part-time. The full-time number for 1979 is 172, up only slightly over the previous year, but much higher than the seventy-three persons in 1971. Between 1976 and 1978 the number of male faculty actually declined twenty-eight, while women rose by thirty-nine. In 1979 this trend was sharply reversed. Forty-three additional faculty were engaged this year, and forty of them were men!

Table 24 also provides information about part-time instructional staff. As noted above, their number is down significantly. But the decrease is totally in males. Each year the number of women increases, and that was the situation in both 1978 and 1979 despite the overall drop. Women are about twice as involved in part-time teaching as is evident full time.

Table 25 presents all of this information in far more detail for each position in all three categories of employees. Despite some varied statistics within categories, the number of women in administrative posts rose again this year. The lone female chief administrator resigned and was replaced by a male, but there are now five women academic deans. Interestingly enough three of them are employed by Roman Catholic schools. And the number of women deans of students is also up this year to fourteen. Although business officers dropped by three, an equal number of new women directors of development started their work.

Women in theological faculties also increase slowly. Despite the modest overall increase of only three women, full professor status was achieved by an additional nine persons--up from twenty-seven to thirty-six in 1979. And the customarily tenured ranks of full and associate professor now hold seventy-eight women, up considerably from the twenty-eight reported in 1972. There are now almost as many women in the two upper ranks as in the lower ones, also a substantial reversal. Comments have already been made about the employment of women part-time.

It was only in theological libraries that the role of women declined this year, and that was in part-time service. Table 25 also provides this information.

Table 26 parallels the previous table, presenting the data on the employment of blacks in each of the categories. Blacks in administrative posts

continued the fluctuations apparent in recent years. This year they are down three persons. This variation has occurred in alternate years since 1975. The specific job situations for the past four years are reported in the table.

Black faculty did increase slightly this year to eighty-four full-time persons, up four from last year. Tenured blacks also increased from forty-eight to fifty, although full professors decreased by one. Thirty-one of these eighty-four full-time black faculty are in the five primarily black institutions, constituting 72.1% of their teaching staff. The remaining fifty-three blacks are spread very thinly across the 188 remaining primarily white seminaries where they are only 2.2% of the faculty.

The employment of black personnel in libraries is very small. This year it numbers fifteen persons out of 498, full and part-time. Seven of the total are in the five black schools of theology, leaving just eight black persons in the 188 schools, a quite bleak record.

COMPENSATION

Tables NN-VV present the full details on compensation. But first note the definition of the term. Total compensation is reported, consisting of actual cash paid; housing allowance or value (if any), value of fringe benefits, such as insurance, medical, etc. if paid by the school, and institutional contribution to pension. Salaries for administrators and library staff are almost always provided for twelve-month contracts with faculty paid for the school year only. If faculty teach beyond the contract, for example in continuing education or summer school, payments for such have been excluded. Only compensation for regular duties has been included. Institutions vary widely in their policies toward fringe benefits. Some offer very good salaries, but limited or even no perquisites of this kind. Others elect to provide less cash but add extensive non-taxable privileges in the forms of insurance or pension contributions. Hence one must be cautious in comparing institutional contract salaries to be certain that the bases are the same.

Dollar comparisons are not very informative in recent years because of the high level of inflation. This fact has been given very careful attention in the following two sets of salary information. It is not reflected in the appendices. To be more accurate, the prevailing Consumer Price Index is shared with member schools in this report as well as the net effect this has on actual remuneration. The index rose (July 1, 1978, to June 30, 1979) +11.3% in the most recent academic year, the highest since 11.7% was recorded in 1974-75. And the rate has actually increased to about thirteen percent at this January 1980 writing. As will be apparent almost no category of employees matched this distressing rate.

Administrative Compensation

This information is available in Table 27, distributed for each of the job categories. Despite an +8.2% overall increase for accredited schools, almost all

Faculty Compensation

These details are found in Tables 28-33 with comparisons for each of the preceding five years. Keeping in mind that this is total compensation (cash, housing, fringe benefits, and pension), faculties collectively fare even less favorably than administrators, with respect to the consumer price index. Tables 28-30 report accredited school faculty salaries; Tables 31-33 associate member seminaries. Tables 28 and 31 record average dollar amounts; Tables 29 and 32 the percentage of dollar increase; and Tables 30 and 33 the net change in real purchasing power when compared with the current index. The average dollar increase this year in accredited schools was \$1,963, or +8.0%. But it fell substantially below the CPI rise of +11.3%. Every faculty rank shared in this loss, with full professors losing the least and instructors the largest percentage. Faculty in associate schools, whose salaries are uniformly lower, fared even worse.

Noting Tables 30 and 33, in only one of the last five years have accredited faculty exceeded inflation. In associate schools inflation was higher in all five.

Library Compensation

Table 34 provides a summary of library compensation. Oddly enough in all categories of professional employees only library personnel in associate member

TABLE 34
TRENDS IN LIBRARY STAFF COMPENSATION

C.P.I. Change			+ 6.7%		+ 7.7%		+11.3%

schools (twenty-six persons) exceeded inflation. Their average salary increase was +13.7%! This is surely fitting, since this group of persons receive the lowest average compensation of any of the categories.

Full details on salaries are available in the appendices. See Tables NN, OO, and PP for administrators; QQ, RR, and SS for faculty; and TT, UU, and VV for librarians.

Summary

Table 35 illustrates the total impact of inflation on compensation across the ten-year span that these books have been published. The cost of living

TABLE 35
TEN-YEAR COMPARISONS IN
COMPENSATION PATTERNS
(Excludes Roman Catholic Schools)

	1969-70	1979-80	% Change
<u>All Administrative Avg.</u>			
Accredited Schools	\$15,966	\$28,508	+78.6%

1974-75	165,093,000	166,389,000	-1,296,000
1975-76	182,490,000	182,266,000	+ 224,000
1976-77	198,875,000	196,195,000	+2,680,000
1977-78	215,787,000	212,192,000	+3,595,000
1978-79	238,727,000	235,187,000	+3,540,000

Financial data since 1968/69 are indicated above in Table 36. The gradual improvement noted in recent years continued in 1978-79. The surplus/deficit situation was reversed in 1975-76, and has not recurred. But please note that one should not be misled by the apparent large surplus. It actually represents only \$18,534 per school, a quite insignificant sum, representing only 1.5% of the average expenditure budget. Consequently changes downward in the revenue situation would immediately have serious results.

Table 37 distributes this information among the various income categories and reports it on a "per student" basis. Educational and general revenue/expenditure data reveal a continuing surplus situation. This year that dollar

TABLE 37
TRENDS IN CATEGORIES OF FINANCIAL DATA: PER STUDENT BASIS
(Includes All Schools)

	1974-75	1975-76	1976-77	1977-78	1978-79
<u>Educational & General</u>					
Revenues	\$3,617	\$3,594	\$3,762	\$3,843	\$4,134
Expenditures	3,505	3,449	3,533	3,601	3,870
Surplus/Deficit	+112	+145	+229	+242	+264
<u>Student Aid</u>

Expenditures	402	404	436	436	470
Surplus/Deficit	-115	-127	-132	-115	-140
<u>Auxiliary Enterprises</u>					
Revenues	\$ 578	\$ 591	\$ 609	\$ 618	\$ 674
Expenditures	611	604	642	664	721
Surplus/Deficit	- 33	- 13	- 33	- 46	- 47
<u>Totals</u>					
Revenues	\$4,482	\$4,462	\$4,675	\$4,782	\$5,138
Expenditures	4,518	4,457	4,611	4,701	5,062
Surplus/Deficit	- 36	+ 5	+ 64	+ 81	+ 77

sum reached \$264 per student. But this is at least partially negated by deficit data on student aid (-\$140) and the operation of auxiliary enterprises (-\$47), both per student. The high cost of education (and everything else) makes subsidies to many theological students absolutely essential if they are to enroll. But institutions are simply not receiving additional resources designated for student aid in sufficient quantity to match these needs, hence forcing the allocation of general revenues to such use. This sum rose to its highest level ever per student in 1978-79. It should be noted that a parallel, but more

modest, situation pertains with respect to auxiliary services (food, dormitories, etc.). On the average they continue to add to institutions' financial problems.

From Table 38 it is apparent that both revenues and expenditures have risen in the average somewhat more rapidly than the impact of inflation. This surely

TABLE 38
CHANGES IN AVERAGE PER SCHOOL FINANCIAL DATA:
EDUCATIONAL AND GENERAL REVENUE/EXPENDITURES

	1968-1969	1978-1979	% Change
Revenues	562,265	1,249,880	+122.3%
Expenditures	572,618	1,231,346	+115.0%
Change in the Consumer Price Index, Ten Years from 1968-69 to 1978-79			+ 98.4%

reflects the fact that the "average institution" has also grown considerably, and funds needed to support such expansion have been available.

Sources and Proportions of Revenue

These observations are based on an examination of Tables AA-EE in the appendices. The "average" seminary continues to receive about 30% of its educational and general revenue from tuition, which was slightly more than \$1,200 per student last year. But averages are deceptive. The lowest average tuition (and fees)--\$407--was received at Southern Baptist schools; the highest in Protestant Episcopal--\$2,240. Gifts and grants, including support received from denominations or local churches, as well as individuals, ranked highest. The average institution received more than 40% of educational and general revenue from this source. Southern Baptist seminaries, with the lowest tuition, obtained 69% of revenue from this source. The smallest was the inter- or nondenominational schools with only 23%. The largest per student amount went to Protestant Episcopal schools--\$2,582, followed closely by Presbyterian, U.S.--\$2,445. Endowment

income ranged from a high of \$3,889 per student (Episcopalians) to a low of \$231 (Southern Baptists). The largest amount of total per student revenue for educational and general purposes was Episcopal--\$9,069; the least, \$2,421 (Southern Baptists). Note especially Tables AA and CC for these details. Tables DD and EE also provide regional information. It is also apparent that per student revenues do vary inversely in relation to size. On any per capita basis it is clear that the larger institutions are more economical.

Patterns of Expenditure

Full details regarding expenditure patterns are found in Tables FF-JJ in the appendices. Across the years these have not changed very much. The average educational and general expenditure for administration is around 30%, although somewhat larger in the smaller institutions. The percentage devoted to instruction ranges from about 40% to 50%, although slightly lower in the schools with smaller enrollments. Library budgets are around 9% to 12%, with the balance in operation and maintenance expenditures. Denomination groupings do show some variations. Southern Baptist schools, all of which are large, spend only 21% on administration and 58% for instruction. In each instance this is the lowest and highest ratio among the denominations. Per student expenditures for library range from a low of \$198 (Southern Baptist) to a high of \$788 (Protestant Episcopal). Yet both groups of institutions allocate the same 9% of expenditures to the library, illustrating the impact of size of the statistics.

These and other comparisons may be made by examining Tables AA-JJ.

TABLE B.
ENROLLMENT TRENDS OF MEMBER SCHOOLS
1956 - 1979

Data in the table are presented for selected years between 1956 and 1979. Where the first year of membership falls between those listed in the table, it is indicated by the year.

Footnotes

1. Data for this school are the combined totals for the Covina and Berkeley campuses prior to 1975.
2. Data prior to 1972 are those of Pine Hill, one of the institutions merging to form the Atlantic School of Theology.
3. Pre-1970 data are combined totals of prior institutions.
4. Pre-1974 data are combined totals of prior institutions.
5. Fuller's total enrollment includes students in the School of Psychology which ATS does not accredit.
6. Pre-1974 data are the combined totals of the two prior institutions.
7. The 1968 enrollment figure is the combined totals for the two prior institutions.
8. Pre-1968 data are combined totals of prior institutions.
9. Pre-1978 data are combined totals of prior institutions.
10. In 1979 the University of the South also enrolled several hundred extension students who are not included in the Fact Book data.
11. Data prior to 1971 are the combined totals of the two schools which united to form Vancouver.
12. Enrollment data are the combined totals of Yale and Berkeley prior to 1971.

Footnotes

1. These institutions became ATS members during 1979. Since their enrollment data were not included in the 1978-79 Fact Book, the revenue/expenditure tables (AA-MM) exclude their data.
2. The Toronto School of Theology is the coordinating agency for seven theological schools. All student registrations appear in the data supplied by those individual institutions.
